

## HEVILIFT GROUP – ENVIRONMENTAL POLICY

The Hevilift Group is committed to environmental responsibility through consideration and evaluation of environmental impact as an integral part of our risk management program. Our belief is that actions taken now will have long term financial, social and environmental benefits.

Evaluation of environmental impact is mandatory during risk management of all tasks thereby establishing a process that integrates environmental responsibility into Hevilift Group's activities.

In pursuit of our environmental policy the Hevilift Group will:

- Promote environmental awareness and responsibility among all members of the Hevilift Group,
- Promote the principles and practices of environmental responsibility by sharing knowledge and experience with our stakeholders and business partners;
- Strive for practicable environmental best practice;
- Recognise our obligations, both locally and globally, to present and succeeding generations;
- Develop a balanced approach designed to meet the needs of our organisation, while allowing us to fulfil our environmental obligations.

Integral to the implementation of this policy, our Environmental Management System Manual provides the platform to educate the organisation on matters of environmental concern and interest that impact the Hevilift Group.

Continued development, through an ongoing commitment to improvement in operational practices and well developed procedures, establishes a framework that will support the efforts of the Hevilift Group in responsibly managing our environmental footprint.

This Company Policy is to remain in force unless otherwise determined by the Group Managing Director.
